

CORRECTION

In the article by Bates ER, Babb JD, Casey DE, et al., “ACCF/SCAI/SVMB/SIR/ASITN 2007 clinical expert consensus document on carotid stenting: a report of the American College of Cardiology Foundation Task Force on Clinical Expert Consensus Documents (ACCF/SCAI/SVMB/SIR/ASITN Clinical Expert Consensus Document Committee on Carotid Stenting),” which appeared in the January 2/9, 2007 issue of the journal (*J Am Coll Cardiol* 2007;49:126–70), the following correction should be made:

On page 139, the fifth sentence under the heading “Lipid-Lowering Therapy,” 20 mg should be changed to 80 mg so that the sentence reads, “The SPARCL (Stroke Prevention with Aggressive Reduction of Cholesterol Levels) trial studied atorvastatin 80 mg for secondary prevention of stroke in 4,731 patients without coronary artery disease and documented a 16% relative risk reduction for recurrent stroke (136,136a).”
